

کمیته تحقیقات و فناوری دانشجویی
دانشکده مدیریت و اطلاع رسانی پزشکی
دانشگاه علوم پزشکی ایران

با همکاری

کمیته تحقیقات و فناوری دانشجویی
دانشگاه علوم پزشکی کردستان

عنوان کارگاه:

مقاله یاب حرفه ای شو!

راهکارهای جستجوی ساده و پیشرفته
در پایگاه های اطلاعاتی

همراه با اعطای
گواهی معتبر

از دانشگاه علوم پزشکی ایران

رایگان

در بستر الوکام

مدرس:

سرکار خانم دکتر ناهید گویلی

استادیار کتابداری و اطلاع رسانی پزشکی،
عضو هیئت علمی دانشگاه علوم پزشکی کردستان
سرپرست کتابخانه مرکزی
دانشگاه علوم پزشکی کردستان

تاریخ برگزاری کارگاه:

یکشنبه ۲۴ خرداد ۱۴۰۵

دوشنبه ۲۵ خرداد ۱۴۰۵

ساعت: ۱۶ تا ۱۸

جستجوی هوشمند، پژوهشی اثربخش

آنچه در این کارگاه مطرح خواهد شد...

- ✓ سواد اطلاعاتی
- ✓ آشنای مختصر با اینترنت و وب
- ✓ عوامل موثر بر جستجوی موفق
- ✓ انواع پایگاه های اطلاعاتی
- ✓ جستجوی عملی در گوگل اسکالر
- ✓ جستجو در پایب مد
- ✓ جستجو با استفاده از هوش مصنوعی

Components of information literacy

عوامل موثر بر جستجوی موفق؟؟؟؟؟؟؟؟؟؟

ابزار جستجو

راهبردهای جستجو: راهبرد جستجو، عبارت است از فرایندی که از طریق آن، موضوع و نیاز اطلاعاتی کاربر مورد جستجو قرار می گیرد.

پوشش موضوعی، پوشش زمانی، پوشش جغرافیایی،
پوشش مجلات
و...

کلیدواژه

پیشنهادهایی برای یافتن کلیدواژه های مناسب

- ✓ کلیدواژه های مقالات مرتبط (دفترچه یادداشت فراموش نشود)
- ✓ مطالعه مقالات مرور نظام مند (بررسی استراتژی جستجو)
- ✓ بانک مستندات کتابخانه ملی
- ✓ اصطلاحنامه های ایرانداک (جهت یافتن جایگاه موضوع در درخت دانش)
- ✓ سرعنوان های موضوعی پزشکی (MESH)
- ✓ جستجو در پایگاه های استنادی
- ✓ هوش مصنوعی

جستجوی عملی برای یافتن و گسترش کلیدواژه ها

✓بانک مستندات کتابخانه ملی

✓اصطلاحنامه های ایرانداک (جهت یافتن جایگاه موضوع در درخت دانش)

✓سرعنوان های موضوعی پزشکی (MESH)

✓جستجو در تزاروس اریک

✓جستجو در تزاروس یونسکو

✓جستجو در پایگاه های استنادی

Purpose and Scope

The ERIC Thesaurus is a list of terms representing research topics in the field of education. Descriptors from the ERIC Thesaurus are assigned to every document in the ERIC digital library to describe its subject content.

Terms in the ERIC Thesaurus represent the vocabulary used in the documents that comprise the ERIC digital library collection. Learn more about how the Thesaurus is updated in this [archived webinar](#).

The ERIC Thesaurus contains a total of 11,818 terms. There are 4,552 Descriptors and 7,133 Synonyms. There are also 133 Dead terms which are no longer used as Descriptors but remain in the Thesaurus to aid in searching older records. The ERIC Thesaurus was last updated in February 2021. The updated Thesaurus includes 21 new Descriptors, 36 new Synonyms, and changes to 39 existing terms. For more information, view the [full list of updates](#) and [download the updated file](#).

Child abuse, **drug addiction** and mental health problems of incarcerated women in Israel (Article)Chen, G.^a , Gueta, K.^b  Save all to author list^aDepartment of Criminology, Ashkelon Academic College, Israel^bDepartment of Criminology, Bar-Ilan University, Israel

Abstract

[View references \(98\)](#)

The mental health problems and pathways to **drug addiction** and crime among female inmates have long been of interest to researchers and practitioners. The purpose of the current study was to examine the possible association between multiple types of childhood abuse, mental health problems, and **drug addiction** and the incarceration of 50 Israeli women in prison. The findings indicated that female inmates come from risky families with a high prevalence of family mental health problems, parental **drug addiction** and crime, and sibling **drug addiction** and crime. Furthermore, they revealed that incarcerated women from risky families were victims of multiple types of childhood abuse and neglect by their parents, as well as their siblings. Overall, the results suggest that the adverse consequences of a family's mental health problems are much more dramatic than we assumed to date, and that women are more likely than men to be the victims of multiple types of childhood abuse and neglect, as well as suffering more severe psychiatric problems, depression, and **drug addiction**. The implications of these findings are discussed. © 2015 Elsevier Ltd.

Abstract

The coronavirus disease 2019 (COVID-19) pandemic causes fear, as its immediate consequences for the public have produced unprecedented challenges for the education and healthcare systems. We aimed to validate the fear of COVID-19 scale (FCoV-19S) and examine the association of its scores with health literacy and health-related behaviors among medical students. A cross-sectional study was conducted from 7 to 29 April 2020 on 5423 students at eight universities across Vietnam, including five universities in the North, one university in the Center, two universities in the South. An online survey questionnaire was used to collect data on participants' characteristics. health literacy, fear of COVID-19 using the FCoV-19S, and health-related behaviors.

April 2020 on 5423 students at eight universities across Vietnam, including five universities in the north, one university in the center, two universities in the South. An online survey questionnaire was used to collect data on participants' characteristics, health literacy, fear of COVID-19 using the FCoV-19S, and health-related behaviors. The results showed that seven items of the FCoV-19S strongly loaded on one component, explained 62.15% of the variance, with good item-scale convergent validity and high internal consistency (Cronbach's alpha = 0.90). Higher health literacy was associated with lower FCoV-19S scores (coefficient, B, -0.06; 95% confidence interval, 95%CI, -0.08, -0.04; $p < 0.001$). Older age or last academic years, being men, and being able to pay for medication were associated with lower FCoV-19S scores. Students with higher FCoV-19S scores more likely kept smoking (odds ratio, OR, 1.11; 95% CI, 1.08, 1.14; $p < 0.001$) or drinking alcohol (OR, 1.04; 95% CI, 1.02, 1.06; $p < 0.001$) at an unchanged or higher level during the pandemic, as compared to students with lower FCoV-19S scores. In conclusion, the FCoV-19S is valid and reliable in screening for fear of COVID-19. Health literacy was found to protect medical students from fear. Smoking and drinking appeared to have a negative impact on fear of COVID-19. Strategic public health approaches are required to reduce fear and promote healthy lifestyles during the pandemic.
