MRI

MRI ward of Kowsar Hospital of Sanandaj was established in 2016. The ward is equipped with 1.5 tesla Siemens Avanto MRI unit and it started to offer services to patients in 2017. The area is about 280 m² and comprised of a magnet room, control room, pantry, locker room, recovery, admission, and waiting room. The ward head, a radiologist, technicians, and staff including admission, preparation, and cleaning service personnel work in three shifts all days a week. Quality diagnosing services are offered according to tariffs determined by the government. MRI tests such as imaging tests of the brain and spinal cord, joint and skeletal, abdomen and pelvis, and lungs are available. Moreover, MRI scan with contrast, angiography, venography, MRU, MRCP, and MRE are offered every day.
