Pathology Laboratory

Pathology Laboratory supports physicians at Hospital and elsewhere by performing testing services for diagnostic and therapeutic evaluations. The laboratory teams consists of highly experienced physicians, scientists, medical technologists, medical technicians, histotechnologists, cytology technologists, pathologists assistants, phlebotomists, lab assistants, biologists, chemists, microbiologists, geneticists, genetic counselors and other specialists all working collaboratively.

Besides serving patients, the laboratories also do testing for other clinics and hospitals nationally and internationally.

In Hospital, clinical laboratory testing for patients is available, as well as consultative work for the setup, staffing, equipment purchase and evaluation, and test repertoire selection for referring physicians office laboratories.

service consist of;
